PER UN FRONTE DI LOTTA INTERNAZIONALE tra lavoratori occidentali, lavoratori immigrati e lavoratori del mondo musulmano
Against the war politics of the European governments!

After the facts of Paris the president Holland said: “We are at war.” In a few weeks the European states have put into action their aircraft carriers, their fighter bombers, their special forces. With these military operations the European powers are boosting the war they have been carrying on well before the 13th of November. The deep reality of this war has now bounced and hit the Western countries.

This war has been launched by European powers at least 200 years ago with the colonialist occupation of North African and Middle Eastern countries. It has been continuing in the XX century with the “pacific” instruments of financial sharking and embargo simmered by Washington, London, Paris and Rome, under the fig-leaf of the UN flag.

In this war, these five-year war of aggression, conducted by the Western powers - to the total benefit of banks’ and Western corporations’ profits - has led to the bombing, the invasion, the shattering and the devastations of countries like Iraq, Libya, Syria, and Afghanistan.

This war of aggression - a front of which is also located within the European territory - has been continuing during the racist treatment reserved to immigrant workers by the European democracies - and is aimed and is aiming at plundering the natural and human resources of the Arab and Islamic World and at enriching the resistance opposed by that world’s peoples to the hell in which the ex-colonial powers want to confine them.

For the peoples and the exploited of Baghdad, Gaza, or Tripoli, it was this war of aggression conducted against them by the Western World that was nothing new. They have learned to know it much earlier than the 13th of November. What is new in recent times is that some small splinters of this war have now bounced and hit the Western countries.

Although in disagreement with each other on the means and timing of the war with which they hope to establish total control over the Arab-Islamic World, Holland, Merkel and Renzi say that it is in the interest of European workers and immigrants to support the war of aggression against the peoples of the South of the World. A united front that is able to organize a united front between the Western proletariat and the Islamic world’s working masses. A united front that will be able to put in action a united front between the Western proletariat and the Islamic world’s working masses. A united front that will be able to put in action a united front between the Western proletariat and the Islamic world’s working masses.

For Italian and immigrant workers, it would be suicidal to believe those words. Indeed, insecurity is caused exactly by the action of the European governments and by the capitalist classes they represent.

On a domestic level, insecurity is caused for example by measures that make labour more precarious, or cut social services, or intensify the criminalization of immigrants of Islamic faith, or intensify the criminalization of immigrants of Islamic faith, or intensify the criminalization of immigrants of Islamic faith. For Italian and immigrant workers, it would be suicidal to believe those words. Indeed, insecurity is caused exactly by the action of the European governments and by the capitalist classes they represent.

On a foreign level, insecurity is caused for example by the war policies in North Africa and in the Middle East, triggering the obvious actions of the Western powers - with their super-exploitation and the racist treatment reserved to immigrant workers by the European democracies - to the total benefit of banks’ and Western corporations’ profits. For Italian and immigrant workers, it would be suicidal to believe those words. Indeed, insecurity is caused exactly by the action of the European governments and by the capitalist classes they represent.

The way to take is the opposite one. The proletarians and the “common people” will be able to get true safety only by putting in place policies aiming at occasions of debate, organization and fight together with immigrant workers, with the double objective of rejecting the “domestic and foreign” policies of the European governments and of supporting unconditionally the anti-imperialist resistance of the Islamic world’s working masses.

On this way it will be possible to bring out the perspective, that in the opinion of us, communists of the “Che Fare” Organization, cannot be the perspective of European democratic left, or of Islamic institutions, but is the perspective of revolutionary communism, the only able to organize a united front between the Western proletariat and the working masses of the South of the World. A united front that is necessary to fight against the monster, the capitalistic social system that enchains the ones and the others, even if in different measures and ways.

Against every discriminatory and racist measure toward immigrant workers!

Against the criminalization of immigrants of Islamic faith!

Against the militarization of towns, aiming at strengthening the “emergency” politics of the European governments!

Against the criminalization of immigrants of Islamic faith!
