## **Total solidarity with the struggle of the Palestinian people!**

The devastation and massacres underway in Gaza and the West Bank are not the unexpected result of a group of madmen who installed themselves overnight in the halls of power in Israel. They are the necessary consequence and the very rational conclusion of the ferocious neo-colonial aggression that the State of Israel, supported by the entire West, has been conducting against the Palestinian people **for over 70 years** in order to settle in their land, weaken their indomitable spirit of resistance and disperse it to other Middle Eastern countries.

The aggression that Israel has been waging since October 7, 2023 is fully supported by the United States, the Meloni government's Italy and all European countries. Without this decisive military, diplomatic, political and economic support, Israel would have no chance of carrying out its criminal policy. The US and the EU support it for two main reasons:

1) the current Israeli policy is a cog in the work that the American and European bourgeoisies assigned to the Israeli state over 70 years ago, when they gave birth to it (exploiting the drama of the extermination of the Jews carried out in Europe by the European capitalist civilization itself) to install their watchdog in the Middle East, capable of keeping the working masses of the Muslim world under control and guaranteeing the plundering of natural and human resources of the area to the advantage of Western multinationals and the Zionist bourgeoisie.

2) The US and the EU support Israel's current aggression in Gaza and the West Bank because the crushing and expulsion of Palestinians from Gaza and the West Bank are also required by the objective that the US and the EU intend to pursue in today's world economic situation: to build their own economic and geopolitical corridor from Europe to India (the IMEC corridor) with which to hinder Russian and especially Chinese influence in the Middle East and Africa, and with which to take another step towards the international encirclement of Beijing required by the aggression that the US and, at its tail, the EU are planning against the exploited Chinese and Asians.

Despite this international deployment, despite the devastation and bombs dropped every day by Israel, despite the mass hunger and thirst scientifically induced by the Israeli army, **the Palestinian people are heroically resisting, continuing their long-standing struggle to resist the machine that would crush them and drive them out of the land where they have been settled for millennia.**

The struggle for the national and social redemption of the Palestinians cannot find support either in the EU's inconsistent "criticism" of Netanyahu, or in the multipolar order promoted by Xi's China and Putin's Russia.

The EU would like Netanyahu to act with less brutality because it fears that Israeli barbarism could "excessively" strengthen the anti-Western sentiments of the exploited masses of the Middle East and Muslim immigrants in Europe. To his Western allies and protectors, Netanyahu replies that, in order to pursue the objectives that are also close to the heart of Brussels and Washington, there are no methods different from those he currently applies in Gaza and the West Bank. After all, that's how it is! So much so that the hypocritical European rulers do not go beyond a few hypocritical crocodile tears, they continue to provide economic and military assistance to Israel and to demand the surrender of the Palestinian Resistance.

Russia and China, for their part, know that current Israeli and Western policy in the Middle East is also directed against them. But the capitalist interests that govern the politics of Russia and China are pushing Moscow and Beijing to close their eyes to what is happening in Gaza and continue to cultivate their business with Tel Aviv.

The struggle of the Palestinian people **can only find support in those who, like the working masses of the Middle East and the exploited of the South of the World**, are hit by the same war machine that is crucifying the Palestinians and only in those who, **like the workers of the West**, begin to experience the social, political and economic weight of the rearmament policies set up by Europe and the United States also to help chain the Palestinian people and the masses Middle Eastern workers.

Faced with what is happening, it is necessary that here in Europe we begin to reflect on the fact that it is in the interest of the workers of Europe (natives and immigrants):

**1) to denounce and counter the criminal support of the EU and European governments in favor of Israel, and at the same time**

**2) unconditionally support the struggle of the Palestinians.**

Beginning to take some steps in solidarity with the Palestinian people also means beginning to oppose the policies with which the United States and the European Union intend to prepare aggression to enslave workers in Asian countries and the entire Global South. The European rearmament plans (both in the "sovereignist" version dear to the Italian government, and in the pro-European version dear to a large part of the parliamentary opposition) are a fundamental part of these policies, which will not bring to the workers of the West the well-being promised by the imperialist crusaders, Trump, von der Leyen and Meloni in the lead: they will reserve for the proletarians of the West and their children the role of cannon fodder in the war to try to enslave peoples who, as the dramatic events in Palestine also demonstrate, they will not be at all (and rightly so!) willing to bow their heads.
